

Blow Out Cleaner & Descaler

Line Cleaner and Descaler

Blow Out Cleaner & Descaler is the most aggressive line cleaner and descaler ever developed. Independent tests confirm that our patented SynTech®, the world's only synthetic acid, dissolves nearly 15% more calcium than Muriatic (hydrochloric) acid. Still, all that potency comes with a triple-zero Hazardous Material Index Score, which makes our line cleaner safe for your equipment, safe for your personnel and safe to store anywhere you wish.

Blow Out Cleaner & Descaler breaks down calcium, lime, scale, milk stone, beer stone and other deposits which, until now, required the use of corrosive and dangerous acids or caustics. What's more, because SynTech is not an acid, we can combine it with surfactants, detergents and other ingredients to eliminate secondary and tertiary steps in your cleaning process.

The potency of Blow Out Cleaner & Descaler combined, with our safety profile, makes it the natural choice of the U.S. Navy and U.S. Coast Guard. In fact, Hospitality Cleaner, Descaler & Deodorizer Exterior is the only non-acid cleaner that meets current Navy requirements for the cleaning of heat exchangers aboard their ships.

Blow Out Cleaner & Descaler can also be used to safely descale cooling towers, heating coils, boilers and any equipment that tends to build up calcium such as in food preparation plants, hospitals, even nuclear power facilities. As Blow Out Cleaner & Descaler neutralizes instantly with fresh water, we remove the time and material costs associated with additional steps needed with acid-based products. Blow Out Cleaner & Descaler is biodegradable per OECD 301D and removes no trace metals from the system, making it legal to dispose of the treated water directly into the sanitary system. Blow Out Cleaner & Descaler is 100% non-corrosive and non-regulated by the D.O.T., and is non-mutagenic to marine life.

- Acid Free
- Non-Caustic
- Dissolves Calcium
- U.S. Navy Approved
- U.S. Coast Guard Approved
- Descales Heat Exchangers
- Cleans Cooling Towers
- Cleans Boilers
- Removes Milk/Beer Stone
- Neutralizes with Water
- No Disposal Requirements

Cleanse It All Global, LLC (CIAG) is a direct distributor of EMS, Environmental Manufacturing Solutions, LLC. EMS is the manufacturer of all products marketed by CIAG and listed on our website. EMS carries all U.S. related certifications, approvals and registration of the individual products. Cleanse It All Global does not assert that we maintain any U.S. related designations for any products marketed or listed on our website. Please reference the EMS website for any and all U.S. related designations for each product in question: www.enviromfg.com
